

Quogue Wildlife Refuge

Summer Field Ecology Program 2020

The Summer Field Ecology Program consists of one-week explorations of the Quogue Wildlife Refuge and surrounding areas. Based on your child's grade entry level for the coming fall, he/she may attend one session of the Ecology Program, and Little Naturalists can register for more than 1 session. This summer marks the **51st Anniversary that the Summer Ecology Program** has been in existence. With this hands-on intense exploration, children will learn some of nature's secrets, and how important the natural world is. Your child will complete this program with more knowledge of and greater respect for the natural world. It is our hope that these lessons and memories will be carried with your children throughout their lives.

Little Naturalists – for children ages 4, 5, 6

This program is designed to introduce and immerse young children in nature through outdoor exploration, hands on activities, games, crafts, and meeting many of the Refuge animals up close. The children will learn respect for the natural world and will have lots of fun in the process. A variety of topics will be introduced to the children including forest and pond habitats, food chains, local plants and animals, birds, mammals, reptiles, animal defenses and adaptations, composting and recycling. During this program, the children do not get wet or muddy. Children can register for more than one session. Each session consists of three days: Tuesday, Wednesday, and Thursday, from 9:00 A.M. to 12:00 P.M.

***We ask that a parent or guardian stay for the brief introduction on the first day of your child's program, which is held in the Nature Center. Due to limited class size, popularity of the program, and priority registration for members, sessions may fill up. So please sign up early and include completed Application, Medical Form/ Immunizations, and Payment. You will be notified as soon as possible if the session is full.**
